Non- Electric Flushing

Advantage contrast

Cocobella smart toilet with n e w flushing system is more powerful than that with gravity-assistedflushing system and with the normal solenoid valve flushing system. It has a waterconsumption as low as 1.0GPF, and the advantage of being able to flush withoutelectricity

	Flushing strength	Water volume for flushing	Raw materials used	Design	Flushing requirement
Gravity-assisted flushing system Normal toilet	★ ★	1.28-1.6GPF	45-50Kg	High water tank	No elec tri city required
Solenoid valve system Intelligent toilet	★	1.GGPF (Booster pump)	40-50Kg	Ordinary design	Elec tri c ity required
Cocobellaflushing system Tankless toilet	★ ★ ★	1.0GPF	30Kg	Tankless design	No elec tri city required

Product advantage: Saving raw materials

With the combination of Cocobellaflushing system and tankless ceramic toilet,we can no longer use cerami c water tank, 15kg of cerami c raw materials canDe sved for each product.

Dutput of toilet tank Shanghai centers

1-year == 10

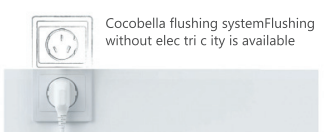

This is a huge improvement. The annual output of cerami c produc ts is about150 million units worldwide, and the weight of cerami c watertank is 15Kg.So theCocobellaflushing system without the water tank can save raw materialsequivalent to 10 Shanghai centers per vear.

Productadvantage:Flushingwithout electricity

At present, in most bathrooms, there is no reserved power socket beside theceramic toilet. When people want to improve the quality of life and upgrade to atankless toilet, they often are stuck in the dilemma of no elec tri c ity for flushing.Cocobellasolves this problem. By using the energy of air, it can realize the flushing ofthe tankless toilet without using electricity.
